

heuristic_perspective

Predicates for the heuristic search/planning in the Organizational Perspective.

author:

Michael Igler (michael.igler@uni-bayreuth.de)

version:

0.8

date:

2011/4/6

compilation:

static, context_switching_calls

(no dependencies on other files)

Public interface

costs_do_process/6

*Calculates the costs for executing a given process ID. Example query:
organizational_heuristic::costs_do_process(pid_a(_), start, Costs).*

compilation:

static

mode - number of solutions:

costs_do_process(?process_object,?var(action),+modelstate,?
instance_identifier,list,-number) - zero_or_one

Protected interface

(none)

Private predicates

costs_necessity_do_process/6

compilation:

static

costs_recommendation_do_process/6
