

esprona_blind_search(Bound)

Blind search state space strategies.

author:

Written by Paulo Moura, adopted to ESProNa by Michael Igler

version:

1.0

date:

2009/12/3

compilation:

static, context_switching_calls

instantiates:

public class

specializes:

public esprona_search_strategy

Public interface

bound/1

Search depth bound.

compilation:

static

template:

bound(Bound)

mode - number of solutions:

bound(?integer) - zero_or_one

Protected interface

search/6

State space search solution.

compilation:

static

template:

search(ProcessModelID,Space,FromState,ToState,Bound,Path)

mode - number of solutions:

search(+process_model,+object,+nonvar,+nonvar,+integer,-list) - zero_or_more

Private predicates
